

## **Chart Links Launches Version 5 of its Outpatient Rehabilitation Software**

*Chart Links furthers its leadership position as a provider of therapy software in the outpatient rehabilitation setting by offering features like flow sheet documentation, a fresh user interface, enhanced time tracking and patient appointment reminders to newly-released Version 5 of its product.*

New Haven, Connecticut (PRWEB) June 19, 2008 – Chart Links (<http://www.chartlinks.com>), a provider of enterprise therapy software, today announces the launch of Version 5 of its outpatient rehabilitation workflow management and clinical documentation product. The therapy software release includes features like flow sheet documentation, a fresh user interface, enhanced time tracking and patient appointment reminders.

“We’re proud to release technology that further enables medical rehabilitation practitioners to improve patient care, measure clinical outcomes and be more efficient,” says Ron Miller, President and Chief Medical Office of Chart Links. “We’re committed to developing comprehensive solutions that meet the complex and cross-disciplinary workflows of outpatient rehab care.”

Chart Links Rehabilitation Software is used in charting patient progress for physical therapy, occupational therapy, speech-language pathology and audiology. It handles the entire outpatient rehabilitation workflow including scheduling, insurance authorization, referral management, treatment documentation, charges, outcomes, reporting, and compliance.

For additional information on Chart Links Rehabilitation Software Version 5, or for a demonstration, contact Shannon Larkin or visit <http://www.chartlinks.com>.

### **About Chart Links:**

For 12 years, Chart Links has developed therapy software that allows medical rehabilitation facilities to be more efficient and to provide a higher quality of care by delivering results in the areas of compliance, outcomes, analytics and revenue.
