

**California Pacific Medical Center Implements
Chart Links Software for Outpatient Rehabilitation Clinical Documentation**

Greater efficiency and increased regulatory compliance drives decision

NEW HAVEN, CT. APRIL 11, 2008—Chart Links, LLC, a leading provider of workflow management software for medical rehabilitation, today announced that the Outpatient Rehabilitation facilities across four campuses of California Pacific Medical Center, a Sutter Health Affiliate in San Francisco, CA, have implemented its electronic documentation software. This implementation will allow California Pacific to gain greater efficiencies and increase regulatory compliance.

Chart Links Rehabilitation Software automates the therapist's documentation of daily progress notes, including evaluations, plans of care, flow sheets, patient education, and charge capture. By automating this and other administrative aspects of the patient management process, rehabilitation facilities realize greater efficiencies in the areas of turnaround time, physician approvals and therapist productivity. The software also helps to reduce overdue documentation and ensure greater compliance with regulatory requirements.

"Our partnership with Chart Links helps fulfill the vision of allowing clinicians in our physical, occupational, hand and speech therapy programs to document electronically," says Tami Chin, Director of Rehabilitation at California Pacific. "The software streamlines operations and electronically prompts our therapists, during documentation, to ensure greater compliance with Medicare CCI edits, modifiers and time tracking. These two elements are essential to running an efficient and profitable department."

"Large multi-campus institutions like California Pacific cannot afford to remain paper based," says Ron Miller, M.D., Chart Links President and Chief Medical Officer. "Computerized scheduling, documentation, compliance and workflow management enable strong management teams – like the one at California Pacific – to improve operational and financial inefficiencies. In addition, our solution is driven by major accreditation and rehabilitation professional standards to help ensure regulatory compliance."

About California Pacific Medical Center

California Pacific Medical Center delivers acute, post-acute, acute rehabilitation and outpatient therapy services, as well as preventive and complementary medicine, disease counseling, family support and wellness treatments. As one of California's largest private, community-based, not-for-profit, teaching medical centers, and a Sutter Health affiliate, California Pacific is able to reach deep into its community to provide education, screening and financial support in some of the city's most underserved neighborhoods. www.cpmc.org

About Chart Links, LLC

For 12 years, Chart Links has developed rehabilitation software that automates workflow for referrals, insurance authorizations, cross-discipline scheduling, documentation, charges, and more. Chart Links allows medical rehabilitation facilities to be more efficient and to provide a higher quality of care by delivering results in the areas of compliance, outcomes, analytics and revenue. www.chartlinks.com
